

Description of the product

Manifold box are designed for manifold with accessories like connection valve sets, drain valves, vents.

The boxes are made of galvanized sheet metal, powder coated with paint RAL 9016 (white).

The back wall is equipped with 2 fitting guides for a distance adjustment between manifold fixing points.

Each guide has 2 screws M8x25 with nuts.

As a standard, manifold box doors are equipped with a key lock.

Side walls have pre-marked entries to provide a side supply for manifold.

Movable feet make possible to adjust the cabinet height above a substrate.

With adjustable front frame the manifold box mount depth can be fixed.
