

Declaration

of company

WAVIN Czechia

Quality

The raw material for production of EKOPLASTIK System is polypropylene type 3 – PPR and type 4 PP-RCT. WAVIN Czechia Company use raw material from prestigious supplier – commercial brands HOSTALEN and VESTOLEN. European and International standards are used while production and testing. The products are certified in many European countries. WAVIN Czechia implemented quality management system according to standard ISO 9001:2016.

Warranty period

All standard products of the EKOPLASTIK System are covered by a 10-year warranty period. All standard products are marked by Roman numerals I., II. in the Catalogue of products. Twenty-four months guarantee period is granted for other products. They are marked by Roman numerals III., IV. in the catalogue of products. This guarantee is subject to a proper product application and adherence to the Assembly Instructions.

Insurance Guarantee

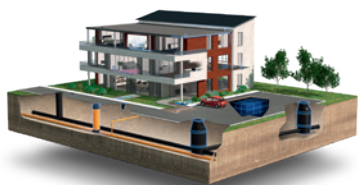

The guarantee is backed by a special insurance contract. The insurance cover relates to damage caused by a faulty product to the sum up to 1 million € in all countries of EKOPLASTIK export.

Operational Life

EKOPLASTIK System for distribution cold and hot drinking water and heating under pressure, is designed to guarantee 50 years operational life at least pressure and temperature conditions shown in “Assembly Regulations” issued by WAVIN Czechia.

Environment

EKOPLASTIK System is produced from nonharmful materials. Polypropylene can be recycled without polluting of the atmosphere. All materials are non toxic and suitable for conveying of drinking water. WAVIN Czechia has implemented environment management system EMS according to ISO 14001:2016.
